Dear All

With the introduction to digital era, it has become increasingly important for all educational institutions to have access to a unified system to collect and store data. The common portal would help in streamlining the process by collecting and tracking demographic information of students from different educational institutions across the state. This would help in better management of educational resources and provide the state government with better insight into the educational sector.

UMIS will act as a single source of truth for other systems that would otherwise need to collect the information again for applications like scholarships, etc. UMIS would enable the HoDs for analysis about enrolments, choices of courses, the performance of students, student dropouts, etc. Through UMIS, students can be educated about career development information, online/offline courses, etc. to help in their academics and career.

This portal also provides a simplified platform for institutions that do not have systems / portals with them to maintain the student details. The Portal may be developed as a common portal for all higher education HoDs to factor the movement of students between various institutions.

### THE ROLE OF THE UNIVERSITY

1. The Universities are requested to provide the student's data in the prescribed format by ensuring that they are in readable, usable, and available for all students.
2. It is mandatory to provide the data of all institutions affiliated to the Universities.
3. If the universities are maintaining a database, the API can also be shared with the Nodal officer of TNeGA.
4. The data required should be given for all communities

Pursuant to the above, the universities are requested to provide the data dump in the prescribed format enclosed herewith on or before 20.03.2023 (EOD)

Regards

AnnieJames
